

ODA Custom Component to Format Date

It has 1 property:

var_dateStr - it takes string which is the date such as 20 September 2023, 2023 September 10, September 10, 2023 etc..

It returns the formatted date in user variable: user.converted_date

```
leave_date:
  component: "System.Text"
  properties:
    prompt: "When are you planning to travel?"
    variable: "data_of_travel_leave"

convertDate_leave:
  component: "convert_date"
  properties:
    var_dateStr: "${data_of_travel_leave}"
  transitions:
    next: "setVariable_Travel_date_leave"
```
